

Easy Sudoku

The goal is to fill in the empty cells, so that each column, row, and region contains the numbers 1 through 9 only once. Each number in the solution therefore occurs only once in each of three "directions". Every row, every column and every 3-by-3 subgrid should contain digits 1 to 9 only.

 2				7	5			
3	1							
5	4		3	1			7	2
			4					7
9	8			6			3	4
7					3
